

Introduction meeting Agenda:

1. Introduction to the company and its values
2. Overview of the internship flow and expectations
3. Discussion on the Major Requirements of the internship
4. Detailed explanation of the tasks and projects you'll be working on

Internship Flow :-

This one-month internship is divided into two phases :

Phases 1 :- Week 1: Skills Test

Interns are assigned various tasks related to their domain.

The tasks serve as a skills test to assess their existing abilities and identify areas for improvement.

Interns are expected to complete the assigned tasks within the week.

Phases 2 :- Week 2, 3, and 4: Live Projects

After the skills test, interns are assigned live projects relevant to their field of expertise.

Interns work on these projects under the guidance of mentors or supervisors.

Major Requirements for the internship :-

1. Github Account
2. LinkedIn account : <https://www.linkedin.com/company/info-trixs/>
 - Post Offer Letter on LinkedIn :-Tag To INFOTRIXS. Use hashtags #infotrixs #infotrixsteam #infotrixsinternship

Detailed explanation of the tasks that you have to complete in the 1st week:-

Java Developer Week 1 Task:

- ❖ Task: Build a Real Time Currency Converter
- ❖ Description:
 - Create a command-line-based real time currency converter system using Java
 - It allows users to add, view, and update favorite currency list
 - Use a option to show the favorite currency
 - You'll need to use API for getting data from the web
 - Create a proper documentation of commands to use
- ❖ Some Help:
 - making request in Java
 - how API works and how to use in Java
 - check docs of some API
- ❖ you can use this API: <https://exchangerate.host/>

(Note : Last Date to submit the task is 08/12/2023. We will inform you about where to submit tasks & how to share on LinkedIn on submission day.)

Thank You

All The Best
